KNEE INSTRUMENTS

A POWERFUL SYNERGY

The GMK UltiMate Efficiency instrumentation combines all the advantages of modern metal instrumentation with the logistical benefits of a single-use set.

YOUR DAILY WORKMATE

A versatile, straightforward and user-friendly set of instruments to support surgeon daily activity.

KNEE.MEDACTA.COM

ACCURATE

Micrometric regulation of all the resection parameters on the tibia and femur, including femoral rotation.

Tibial slope fine tuning with proximal regulation.

Improved femoral sizing through modular condyle support and fully adjustable anterior stylus.

EASY

Easy assembly through **fast connections** and magnetic coupling.

Color coding to facilitate simple identification of key functions.

High contrast marking for a clear visualization.

Ergonomic design improving the surgeons' experience.

FLEXIBLE

Every parameter can be set in a **wide range** of values.

Femoral sizer enables **anterior and posterior referencing**.

One tray to implant **both GMK Sphere and GMK Primary**.

SMART

Streamlined instrument management, with only one tray to wash and sterilize.

Potential **reduction in OR set-up and clean-up time** to optimize OR scheduling thanks to GMK Efficiency features.

Drastic **reduction in weight** compared with a full metal set.
