

COMPANY OVERVIEW

Last update: July 13, 2020

COMPANY DESCRIPTION

Medacta is an international company specialized in the design and production of innovative orthopaedic products and the development of accompanying surgical techniques for joint replacement, spine surgery and sports medicine. Established in 1999 in Switzerland, Medacta's products and surgical techniques are characterized by innovation. Medacta is a pioneer in developing new offerings on the basis of minimally invasive surgical techniques, in particular its Anterior Minimally Invasive Surgery (AMIS) technique for hip replacements. Medacta has leveraged its orthopaedic expertise and comprehensive understanding of the human body to develop the sophisticated MySolutions technology, which offers surgeons highly personalized pre-operative planning and implant placement methodologies by creating advanced personalized kinematic models and 3D planning tools for use in hip, knee, shoulder and spine procedures. Medacta is headquartered in Castel San Pietro, and Rancate, Switzerland.

HISTORY

Medacta was established in 1999 after Dr. Alberto Siccardi, Founder and Chairman of the company, identified an opportunity to improve on incumbent technologies and techniques in the hip replacement market. In 2000, Medacta established its headquarters, manufacturing facility and research and development site in Castel San Pietro, Switzerland. Following his desire to improve care for patients and considering his personal experience with orthopaedic procedures, Dr. Alberto Siccardi dedicated himself to the development of orthopaedic techniques and prostheses. His passion led to the innovation and medical education platforms that have come to define Medacta today. In 2019, the year of the company's 20th anniversary, Medacta became a publicly listed company, officially entering the SIX Swiss Exchange. The 9th M.O.R.E. International Symposium that was held in Lugano, Switzerland, was the perfect occasion to celebrate these milestones.

VISION

Our vision to improve the care and well-being of orthopaedic and spine surgery patients around the world stems from our experience and passion. Our surgical innovations and surgeon education programs focus on getting patients back to their healthy, active lifestyles. While we strive for this goal, we maintain a high regard for sustainability, always considering the environmental and societal impact of the products we create.

MISSION

Our mission is to transform the patient experience by advancing surgical approaches, implants and instruments through responsible innovation. Our innovation began with minimally invasive techniques and has evolved into personalized solutions. Today, we continue to improve our knowledge of the human body, employ cutting-edge technologies such as 3D printing, invest in medical education, research and development, and collaborate with surgeons and universities worldwide.

ASSETS

Innovation is of paramount importance at Medacta and is expressed in the originality of our surgical techniques and products. Innovation is the foundation of all our projects and the basis of our growth strategy. Our innovation is based on three pillars: a complete and profound knowledge of the human body, continuous investments in long-term and short-term research and development (R&D) and the adoption of cutting-edge technologies.

Our philosophy is that **education** is an indispensable tool for transforming innovation into concrete benefits for patients, surgeons and healthcare systems. We also offer professional education to our employees thanks to the Medacta Academy, and support the education of the patients through the MyPractice Development Plan.

We want to change things for a better future. This is the reason why **sustainability** is a fundamental pillar of our way of doing business, in both environmental, economic and social terms.

IN-HOUSE TECHNOLOGY

By directly managing our production units we can control all processes and ensure high standards of quality, flexibility, continuity and efficiency. Thanks to in-house production we can more easily develop our know-how, which is a fundamental driver of innovation. Moreover, in-house production reduces costs and emissions due to the transport of goods, therefore favoring our sustainable approach.

PRESIDENT ALBERTO SICCARDI BIO

Career Highlights: Mr. Siccardi served as CEO of Medacta International since founding Medacta in 1999 until November 2018 and as Chairman of the Company since March 2019. Prior to founding Medacta, Mr. Siccardi's family owned Bieffe Medital SPA, an Italian company operating in the medical device industry. Mr. Siccardi successfully developed and expanded Bieffe Medital internationally as CEO and then subsequently sold the business to Baxter Group in 1997.

Qualifications: Mr. Siccardi has a degree in Pharmacy from the University of Turin (1969) and a Master's Degree in Business Administration (MBA) from SDA Bocconi School of Management in Milan (with distinction).

CEO FRANCESCO SICCARDI BIO

Career highlights: Mr. Siccardi joined Medacta International in 2002 and served as a Member of its Board of Directors since 2003. He then served on the Board of the Company from its incorporation until March 21, 2019. Following the retirement of the Company's Chairman, Mr. Siccardi was appointed Chief Executive Officer as of November 1, 2018. Prior to becoming CEO, he served as Executive Vice President and Medical Affairs Manager (from 2013 to 2014) and as Executive Vice President (from 2014 to 2018).

Qualifications: Mr. Siccardi holds a Master of Science (MSc) in Biomedical Engineering from the Polytechnic University of Milan (2002). He also completed the Executive Program for Growing Companies (EPGC) at Stanford Business School Executive Education in Stanford, California, USA (2009).

SUSTAINABILITY REPORT

Innovation must be sustainable to be of real value for everyone. We want to do everything possible to ensure that sustainability does not remain just an important part of our corporate culture but rather becomes a value shared among all involved in our activities, so that we can actively contribute to the sustainable development policies of the territory and the community to which we belong.
