BEFORE USING THE MEDACTA iMNS™ NAVIGATION SYSTEM, CAREFULLY READ THROUGH THE MANUAL PROVIDED WITH THE SYSTEM AND THE OPERATING TECHNIQUES RELATED TO THE SURGERY TO BE PERFORMED. THE USER IS RESPONSIBLE FOR ANY DAMAGE OR MALFUNCTION CAUSED BY IMPROPER USE OF THE iMNS™ SYSTEM OR OF ANY OF ITS COMPONENTS.

The information contained in this manual and the product to which it refers may be modified by MEDACTA without giving prior notice thereof.

The trademarks and product names quoted in this manual belong to the respective owners.

This manual is only for the trolley unit.
1. COMPONENTS

- NDI POLARIS SPECTRA® CAMERA
- iMAC® COMPUTER
- KEYBOARD
- ISOLATION TRANSFORMER
- TROLLEY
- NDI HOST USB CONVERTER
- CAMERA POWER SUPPLY UNIT (behind isolation transformer)
- FOOTSWITCH
2. COMPONENTS POSITIONING

Before positioning any components on the trolley, make sure that the self locking mushroom head fasteners are located on both the upper and lower shelves, like illustrated in figure 1 and figure 2.

Figure 1 - Placement of the self locking mushroom head fasteners on the trolley upper shelf

![Figure 1](image1)

Figure 2 - Placement of the self locking mushroom head fasteners on the trolley lower shelf

![Figure 2](image2)

The strips and dots illustrated above are used to fix, respectively:
A = iMAC computer
B and C = keyboard
D and E = camera power supply
F = USB converter.

The corresponding fasteners are placed on each component like illustrated in figures 3, 4, 5 and 6.
Figure 3 - Placement of the fasteners on the iMAC

Figure 4 - Placement of the fasteners on the camera power supply

Figure 5 - Placement of the fasteners on the USB converter

Figure 6 - Placement of the fasteners on the keyboard
3. iMac® COMPUTER SETUP
Place the iMac® computer on the upper shelf.
Insert cable B of figure 7 in the iMAC® power socket and cable A of figure 7 in one of the 3 USB ports (شعبه‌های گیربکس USB) located on the back of the computer (figure 8).

![Figure 7 - Trolley upper shelf](image1)

![Figure 8 - iMAC® connection](image2)

4. CAMERA PLACEMENT
Screw the ball joint on the camera ball joint mount through the threaded hole on the lower side of the camera itself, as shown in figure 9.
Unscrew the locking knob 2 of the camera stem 3 (figure 10), insert the ball joint Q assembled with the camera into the stem and securely tighten the locking knob 2 to prevent the joint from slipping from the stem.

![Figure 9 – Assembling the ball joint and the camera](image3)

![Figure 10 – Securing the camera](image4)
Orient the camera as desired and tighten the knob 1. In order to extend the telescopic rod of the camera stem, loosen the locking device 4 (figure 11), make sure that the locking device 2 is firmly tightened and pull up the Q joint. Finally, tighten the locking device 4 to fix the position of the stem.

Figure 11 – Telescopic rod of the camera stem
5. CONNECTION OF THE HOST USB CONVERTER

Place the Host USB Converter and the power supply unit on the lower shelf. Connect the USB cable H to the socket (图片) of the Host USB Converter. Insert the J cable of the power supply unit into the special socket (图片) of the Host USB Converter. Finally, insert the M connector in the corresponding socket of the camera power supply unit.
Place the components onto their corresponding self locking pods.

6. CAMERA CONNECTION

Insert the 14-pin connector of the Host USB Converter in the corresponding socket on the rear of the camera, taking care that the red mark on the 14-pin connector corresponds to the red mark on the socket (figure 14).
7. POWER SUPPLY SETUP

Check that the input voltage agrees with the local mains voltage reading the number you can see through the slot D (figure 16) of the fuse-holder on the transformer’s rear (230 for 220V mains voltage – 115 for 110V mains voltage). If the voltages disagree, refer to the qualified technical staff. Moreover, verify that the switch A (figure 16) is set to OFF (O).

Insert the G connector of the iMAC® power cable and the F connector of the camera power supply unit cable into the C sockets of the REOMED® 600 unit (all the C sockets are suitable), as shown in figure 17.

Insert the power cable S into the B input socket of the REOMED® 600 transformer. The other end must be plugged into a suitable mains power outlet.
8.TURNING ON THE SYSTEM

Connect the footswitch and the keyboard to the USB sockets on the rear of the iMac® computer (Figure 18).

Turn on the REOMED® 600 insulation transformer by setting the switch (A in figure 16) to ON (I).

Check that the Power LED on the power supply unit and the green Power LED (I) on the Host USB Converter become on and the Power LED (I) on the front of the camera starts flashing (figure 19).

Start the iMac© computer by pressing the button on the rear of the computer (figure 20).
9. STARTING THE NAVIGATION SOFTWARE

After having turned on the computer, wait a few seconds for the operating system to boot and any peripherals to be recognised.

For the instructions on the startup and use of the iMNS navigation software, refer to the software manuals.
